CLINICAL EVIDENCES FOR BEAUTY BENEFITS

SkinAx^{2TM} was clinically tested in France, on 35 healthy women with dull complexion. Subjects received an oral supplementation of 150 mg of SkinAx^{2TM} per day, during 8 weeks.

Clinical results show significant effects of SkinAx^{2TM} on skin radiance factors: it regulates skin coloring, increases face luminosity and reduces imperfections. SkinAx^{2TM} also impacts positively the skin firmness and elasticity.

WHAT IS SKIN RADIANCE?

Skin radiance is a subjective concept based on people self-perception. Skin radiance can be evaluated considering 3 skin visual parameters: **color**, **contrast** and **imperfections**.

These factors are the visual consequences of 3 biomechanisms that are associated with skin aging, the main cause of dull complexion:

- **Melanin overproduction**
Impacts directly the color and contrast of the skin.
- **Collagen & elastin degradation**
Acts mainly on imperfections and contrast, through elasticity and firmness.
- **Microcirculation**
Influences skin coloration and increases imperfections.

HOW DOES SKINAX²™ WORKS?

SkinAx²™ is a unique patent-pending solution acting specifically on the **3 mechanisms of action** impairing skin radiance factors. SkinAx²™ also exerts an exhaustive complementary **antioxidant activity**, fighting the first cause of skin degradation.

SkinAx²™ associates 4 bioavailable natural ingredients carefully selected:

- **Flavanol monomers**
From French grape seed extract (*Vitis vinifera* L.).
- **Protected SuperOxide Dismutase (SOD)**
From melon fruit concentrate (*Cucumis melo* L.) from a unique selected French variety.
- **Coated vitamin C**
- **Zinc citrate**

SKINAX²™ SOLUTION

SKINAX²™ APPLICATION

Thanks to its unique mechanism of action, science based efficacy and clinical evidences, SkinAx²™ is a real innovation on the anti-aging beauty market that can strongly claim its benefits and specificities.

SkinAx²™ is recommended at only 150 mg per day, by oral administration.

Science inside, claims outside
